

# Candlesticks = Price Bars

All Candlestick Patterns may also be displayed via OHLC Price Bars!

The data is exactly the same!

As a trader you need to learn to read the sentiment in both formats!

## Candlesticks and their equivalent Price Bars

Bullish Candle & Price Bar

Bearish Candle & Price Bar

### Shooting Star

The open and close should be in the lower third.

A Shooting Star can be either red or green. A green candle will have the open and close reversed on the price bar.

The same concept applies to the following three patterns.

### Hanging Man

The open and close should be in the upper third.

### Hammer

### Inverted Hammer

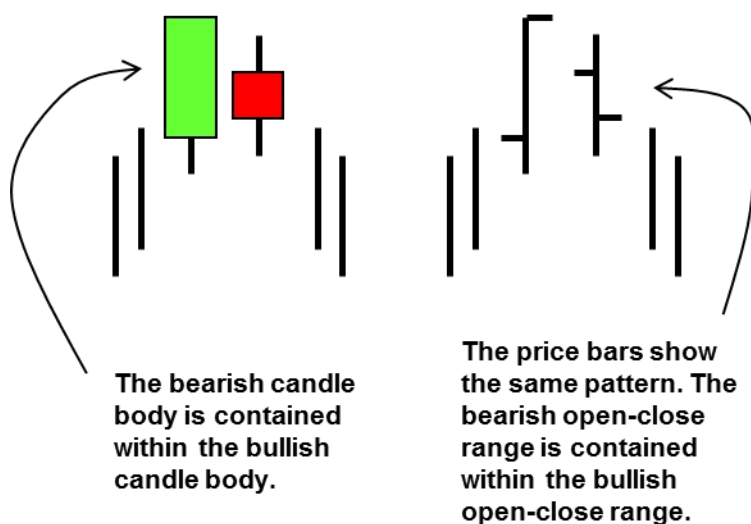

## Doji

Note: All Doji look exactly the same in both candlestick and price bar format!

## Harami

A Harami may occur at either a top or bottom.

### Dark Cloud Cover

### Piercing Pattern

### Bearish Engulfing

The bearish candle **BODY** engulfs the bullish candle body. The tails are not important.

The price bars show the same pattern when comparing the price range between open and close. The open-close range of the bearish (2<sup>nd</sup>) price bar engulfs the open-close range of the bullish (1<sup>st</sup>) price bar.

### Bullish Engulfing

The bullish candle **BODY** engulfs the bearish candle body.

The open-close range of the bullish (2<sup>nd</sup>) price bar engulfs the open-close range of the bearish (1<sup>st</sup>) price bar.

### Evening Star

1<sup>st</sup> price bar is bullish. Price ideally gaps up to the star (2<sup>nd</sup> price bar) which may be either bullish or bearish. The bearish (3<sup>rd</sup>) price bar closes below the open-close range of the star.

### Morning Star

1<sup>st</sup> price bar is bearish. Price ideally gaps down to the star (2<sup>nd</sup> price bar) which may be either bullish or bearish. The bullish (3<sup>rd</sup>) price bar closes above the open-close range of the star.

Beyond Candles...

- If you wish to explore beyond candlestick patterns, learning to read shifting sentiment within ALL price action, have a look at articles on our website.
